

# INDEX TO VOLUME XXII

## AUTHORS

	PAGE		PAGE
Aitken, T. R., and M. H. Fisher. Mixing tolerances of varieties of hard red spring wheat.....	392	Carter, E. P., and G. Y. Young. Effect of moisture content, temperature, and length of storage on the development of "sick" wheat in sealed containers.....	418
Alcock, A. W. (See A. Hoffer).....	271	Collatz, F. A. (See C. E. Felt).....	261
Alexander, T. L. (See V. H. Morris).....	351, 361	Coolidge, M. H. (See G. F. Somers).....	333
Anderson, G. (See R. B. Meckel).....	429	Derby, R. I. (See C. G. Ferrari).....	197
Andrews, A. C. (See C. O. Swanson).....	60, 134	— (See W. S. Hutchinson).....	187
Andrews, J. S. Book review: The chemistry and technology of food and food products. II., ed. by M. B. Jacobs.....	349	Dunn, J. A. John C. Baker—man and scientist.....	No. 6, Suppl. p. 7
Arnold, Aaron. Report of the 1944-45 committee on riboflavin assay.....	455	Favor, H. H. (See R. T. Bohn).....	296
Artis, W. G., and R. F. Bawden. Investigation of problems associated with the use of malt in industrial alcohol production.....	22	Felt, C. E., A. C. Buechele, L. F. Borchardt, R. C. Koehn, F. A. Collatz, and F. C. Hildebrand. Determination of shelf life of packaged cereals.....	261
Atkin, Lawrence, A. S. Schultz, and C. N. Frey. Influence of dough constituents on fermentation.....	321	Ferrari, C. G. The Thomas Burr Osborne medal.....	No. 6, Suppl. p. 4
Bailey, C. H. (See P. P. Merritt).....	372	—, W. S. Hutchinson, and R. I. Derby. Multiple bleaching of flour. III. Bleaching efficiency in systems involving nitrogen trichloride and another bleaching gas.....	197
Baker, J. C. Acceptance of the Osborne medal.....	No. 6, Suppl. p. 24	— and D. K. Mechem. Multiple bleaching of flour. I. Bleaching efficiency as influenced by flour agitation and optimum utilization of the bleaching agent.....	101
— Bread as I see it.....	No. 6, Suppl. p. 27	— (See W. S. Hutchinson).....	187
— Selected bibliography.....	No. 6, Suppl. p. 15	Finney, K. F. Methods of estimating and the effect of variety and protein level on the baking absorption of flour.....	149
Barmore, M. A. (See K. F. Finney).....	225, 244	— and M. A. Barmore. Optimum vs. fixed mixing time at various potassium bromate levels in experimental bread baking.....	244
Barnes, R. H., J. E. Maack, M. J. Knights, and G. O. Burr. Measurement of the growth-promoting quality of dietary protein.....	273	— and — Varietal responses to certain baking ingredients essential in evaluating the protein quality of hard winter wheats.....	225
Baumgarten, Werner, A. N. Mather, and Leonard Stone. Glutamic acid content of feed materials.....	514	Fisher, M. H. (See T. R. Aitken).....	392
—, Leonard Stone, and C. S. Boruff. Amino acid composition of grain alcohol fermentation by-products.....	311	Fosnot, R. H., and R. W. Haman. A photometric evaluation of the "appearance" of various malt syrups as influenced by storage conditions.....	522
Bawden, R. F. (See W. G. Artis).....	22	— and — A preliminary investigation of the application of the Karl Fischer reagent to the determination of moisture in cereals and cereal products.....	41
Bayfield, E. G., J. A. Johnson, and E. C. Swanson. Effect of room temperature in experimental baking.....	547	Frey, C. N. (See Lawrence Atkin).....	321
— (See E. C. Swanson).....	214	Garnatz, George (See P. W. Hodler).....	559
Bice, C. W., M. M. MacMasters, and G. E. Hilbert. Wheat starch properties in relation to grain maturity.....	463	Geddes, W. F. (See Max Milner).....	477, 484
Blish, M. J. Book review: The amino acid composition of proteins and foods, by R. J. Block and Diana Bolling.....	272	Glick, David. The choline content of pure varieties of wheat, oats, barley, flax, soybeans, and milled fractions of wheat.....	95
Bohn, R. T., and H. H. Favor. Functional properties of soya flour as a bread ingredient.....	296	— (See Marjorie Howe).....	502
Borchardt, L. F. (See C. E. Felt).....	261	Hads, H. L. (See Eric Kneen).....	407
Boruff, C. S. (See Werner Baumgarten).....	311	Haman, R. W. (See R. H. Fosnot).....	41, 522
Buechele, A. C. (See C. E. Felt).....	261		
Burr, G. O. (See R. H. Barnes).....	273		
Cailleau, Relda, L. E. Kidder, and A. F. Morgan. The thiamine content of raw and parboiled rices.....	50		
Carpenter, L. E. (See E. L. Hove).....	287		

- Hamner, K. C. (See G. F. Somers) . . . 333
- Harrel, C. G. (See E. L. Hove) . . . 287
- Harris, R. H., L. D. Sibbitt, and G. M. Scott. Comparative effects of variety and environment on some properties of North Dakota hard red spring wheat flours . . . 75
- (See L. D. Sibbitt) . . . 531
- Herren, Helen (See D. E. Whitney) . . . 90
- Hilbert, G. E. (See C. W. Bice) . . . 463
- Hildebrand, F. C. (See C. E. Felt) . . . 261
- Hites, B. D. (See R. M. Sandstedt) . . . 161
- Hochberg, Melvin, Daniel Melnick, and B. L. Oser. Simplified colorimetric determination of thiamine in cereal products . . . 83
- Hodler, P. W., and George Garnatz. Communication to the editor: A simple test for riboflavin in enriched flours . . . 559
- Hoffer, A., and A. W. Alcock. Communication to the editor: A rapid method for the combined determination of thiamine and riboflavin in cereal products . . . 271
- Hove, E. L., L. E. Carpenter, and C. G. Harrel. The nutritive quality of some plant proteins and the supplemental effect of some protein concentrates on patent flour and whole wheat . . . 287
- Howe, Marjorie, and David Glick. Activity-pH relationships and inhibition of proteolytic enzyme activity of milled fractions of wheat . . . 502
- Hutchinson, J. B. (See C. R. Jones) . . . 538
- Hutchinson, W. S., C. G. Ferrari, and R. I. Derby. Multiple bleaching of flour. II. Bleaching efficiency in systems involving nitrogen peroxide and another bleaching gas . . . 187
- (See C. G. Ferrari) . . . 101, 197
- Jenness, Robert. Book review: The estimation of vitamin A, by N. T. Gridgeman . . . 462
- Johnson, H. C. An investigation of shorter bread sponges . . . 255
- Johnson, J. A., and C. O. Swanson. Effect of fermentation, rest periods, and formula ingredients on mixogram patterns . . . 204
- (See E. G. Bayfield) . . . 547

- Merritt, P. P., and C. H. Bailey. Preliminary studies with the extensograph . . . 372
- Milner, Max, and W. F. Geddes. Grain storage studies. I. Influence of localized heating of soybeans on interseed air movements . . . 477
- and — Grain storage studies. II. The effect of aeration, temperature, and time on the respiration of soybeans containing excessive moisture . . . 484
- Morgan, A. F. (See Relda Cailleau) . . . 50
- Morris, V. H., T. L. Alexander, and E. D. Pascoe. Studies of the composition of the wheat kernel. I. Distribution of ash and protein in center sections . . . 351
- , E. D. Pascoe, and T. L. Alexander. Studies of the composition of the wheat kernel. II. Distribution of certain inorganic elements in center sections . . . 361
- Norris, F. A. Book review: Industrial oil and fat products, by A. E. Bailey . . . 560
- Oser, B. L. (See Melvin Hochberg) . . . 83
- Pascoe, E. D. (See V. H. Morris) . . . 351, 361
- Sandstedt, R. M., and B. D. Hites. Ascorbic acid and some related compounds as oxidizing agents in doughs . . . 161
- Sandstrom, W. M. Book review: Advances in protein chemistry, by M. L. Anson and John T. Edsall . . . 81
- Schultz, A. S. (See Lawrence Atkin) . . . 321
- Schwain, F. R. Report of the 1944-45 committee on testing biscuit and cracker flours . . . 553
- Sciurini, L. J., and J. C. Wirth. Ethanol production from wheat hydrolysates and stillage by yeast and fusaria . . . 11
- Scott, G. M. (See R. H. Harris) . . . 75
- Sibbitt, L. D., and R. H. Harris. Comparison between some properties of mixograms from flour and unsifted whole wheat meal . . . 531

- (See R. H. Harris)..... 75
- Skovholt, Oscar.** Presentation of the Thomas Burr Osborne medal. No. 6, Suppl. p. 22
- Somers, G. F., M. H. Coolidge, and K. C. Hamner.** The distribution of thiamine and riboflavin in wheat grains..... 333
- Steele, H. K.** Report of the 1944-45 committee on niacin (nicotinic acid) assay..... 448
- Stone, Leonard** (See Werner Baumgarten)..... 311, 514
- Swanson, C. O., and A. C. Andrews.** Dough development and mechanical gluten dispersion in relation to amount of mixing and to the flour-water ratio..... 60
- and — Effects of papain, yeast water, cysteine, and glutathione on gluten dispersion or on disintegration as indicated by gluten recovery and by mixogram patterns..... 134
- (See J. A. Johnson)..... 204
- Swanson, E. C., and E. G. Bayfield.** The effect of mixing speed and dry milk solids on bread volume..... 214
- (See E. G. Bayfield)..... 547
- Westerman, B. D.** (See D. E. Whitney)..... 90
- Whitney, D. E., Helen Herren, and B. D. Westerman.** The thiamine and riboflavin content of the grain and flour of certain varieties of Kansas-grown wheat..... 90
- Wirth, J. C.** (See L. J. Sciarini)..... 11
- Witt, P. R.** Effect of kilning on the amylolytic activity of barley malts. 341
- Woodson, H. W., and H. S. Mackenzie.** Note on a biochemical method for determining crude fiber in corn meal..... 158
- Young, G. Y.** (See E. P. Carter).... 418

## SUBJECTS

- A.A.C.C.,** see American Association of Cereal Chemists
- Absorption,** Soybean flour (Bohn and Favor)..... 296
- Aeration,** Effect on respiration of soybeans with excessive moisture (Milner and Geddes)..... 484
- Air movements,** Effect on localized heating in soybeans (Milner and Geddes)..... 477
- Alcohol**  
Ethyl, see Ethyl alcohol  
Grain, see Ethyl alcohol  
Industrial, see Ethyl alcohol
- Alfalfa,** Glutamic acid content (Baumgarten, Mather, and Stone)..... 514
- Alpha amylase,** see Amylases
- American Association of Cereal Chemists**  
Check sample service on protein and thiamine (Meredith)..... 437  
Committee reports, see Committee reports
- Amino acids**  
In fermentation by-products (Baumgarten, Stone, and Boruff)..... 311  
Microbiological assay (Baumgarten, Stone, and Boruff)..... 311
- Amylases**  
Barley, effect of  
kilning on malt activity (Witt)... 341  
variety and environment (Kneen and Hads)..... 407  
Determination (Landis)..... 1  
Sorghum (Kneen)..... 112  
Wheat, effect of variety and environment (Kneen and Hads)..... 407
- Animal by-products,** Glutamic acid content (Baumgarten, Mather, and Stone)..... 514
- Ascorbic acid,** Oxidizing action in dough (Sandstedt and Hites).... 161
- Ash,** In wheat, distribution in center sections of kernel (Morris, Alexander, and Pascoe)..... 351
- Asparagine,** Effect on microbiological assay of glutamic acid (Baumgarten, Mather, and Stone)..... 514
- Aspartic acid,** Effect on microbiological assay of glutamic acid (Baumgarten, Mather, and Stone)..... 514
- Atmospheric composition,** Effect on bread sponges (Johnson)..... 255
- Baker, J. C.,** Presentation of Osborne medal to..... No. 6, Suppl.
- Baking**  
Experimental, see Baking tests  
Formulae, Effect of ingredients on dough mixograms (Johnson and Swanson)..... 204  
Quality, see Flour, Baking quality  
Tests  
effect of room temperature (Bayfield, Johnson, and Swanson)... 547  
mixing time at various  $KBrO_3$  levels (Finney and Barmore)... 244  
Thiamine loss in (Meckel and Anderson)..... 429  
Water absorption of flour for (Finney)..... 149
- Barley**  
Alcohol production from using malt (Artis and Bawden)..... 22  
Amylases, see Amylases, Barley  
Choline content (Glick)..... 95  
Germinated, effect on amylases (Kneen and Hads)..... 407  
Malt, see Malt  
Varieties, effect on amylases of germinated (Kneen and Hads)..... 407
- Biscuit flour,** Testing (Schwain)..... 553
- Bleaching**  
Agents  
efficiency in multiple systems involving  
 $NO_2$  (Hutchinson, Ferrari, and Derby)..... 187  
 $NCl_3$  (Ferrari, Hutchinson, and Derby)..... 197

**Bleaching (Continued)**

- optimum utilization (Ferrari, Hutchinson, and Mecham).... 101
- Flour, multiple, efficiency of (Ferrari, Hutchinson, and Mecham).... 101
- (Hutchinson, Ferrari, and Derby)..... 187
- (Ferrari, Hutchinson, and Derby)..... 197

**Book reviews**

- Advances in protein chemistry, by M. L. Anson and J. T. Edsall (Sandstrom)..... 81
- The amino acid composition of proteins and foods, by R. J. Block and Diana Bolling (Blish)..... 272
- The chemistry and technology of food and food products. II., ed. by M. B. Jacobs (Andrews)..... 349
- The estimation of vitamin A, by N. T. Gridgeman (Jenness)..... 462
- Industrial oil and fat products, by A. E. Bailey (Norris)..... 560

**Brabender extensograph**, Measurement of dough properties (Merritt and Bailey)..... 372**Bran**, Oat, factor from antagonistic to baking quality of flour (Jones and Hutchinson)..... 538**Bread**

- Baking, see Baking
- Chemistry of production (Baker) No. 6, Suppl. p. 27
- Nicotinic acid assay, colorimetric (Steele)..... 448
- Riboflavin assay, fluorometric (Arnold)..... 455
- Soybean flour in (Bohn and Favor)..... 296
- Sponges, see Dough, Sponge
- Thiamine
  - content, Army (Meckel and Anderson)..... 429
  - retention in Army (Meckel and Anderson)..... 429
- Volume, see Loaf volume

**Breakfast cereals**, Packaged, shelf life determination (Felt, Buechele, Borchardt, Koehn, Collatz, and Hildebrand)..... 261**Bromate**

- Mixing time at various levels (Finney and Barmore)..... 244
- Requirements for dough, prediction (Merritt and Bailey)..... 372

**Cereals and cereal products**

- Choline content (Glick)..... 95
- Glutamic acid content (Baumgarten, Mather, and Stone)..... 514
- Moisture
  - content, relation to shelf life (Felt, Buechele, Borchardt, Koehn, Collatz, and Hildebrand)..... 261
  - determination using Karl Fischer reagent (Fosnot and Haman)..... 41
- Packaged, shelf life determination (Felt, Buechele, Borchardt, Koehn, Collatz, and Hildebrand)..... 261
- Riboflavin assay, combined with rapid thiamine assay (Hoffer and Alcock)..... 271

**Cereals and cereal products (Continued)**

- Storage, effect of
  - aeration, temperature, and time on respiration (Milner and Geddes)..... 484
  - heating on air movements (Milner and Geddes)..... 477
- Thiamine assay
  - colorimetric (Hochberg, Melnick, and Oser)..... 83
  - combined with rapid riboflavin assay (Hoffer and Alcock)..... 271

**Chlorine dioxide**

- Flour bleaching action in combination with
  - NO<sub>2</sub> (Hutchinson, Ferrari, and Derby)..... 187
  - NCl<sub>3</sub> (Ferrari, Hutchinson, and Derby)..... 197

**Chlorine gas**

- Flour bleaching action in combination with
  - NO<sub>2</sub> (Hutchinson, Ferrari, and Derby)..... 187
  - NCl<sub>3</sub> (Ferrari, Hutchinson, and Derby)..... 197

**Choline**

- In cereals and cereal products (Glick)..... 95
- In flax (Glick)..... 95
- In soybeans (Glick)..... 95

**Collaborative studies**

- Biscuit and cracker flour testing (Schwain)..... 553
- Nicotinic acid assays (Steele)..... 448
- Riboflavin assays (Arnold)..... 455

**Committee reports**

- Committee on
  - niacin (nicotinic acid) assay, 1944-45 (Steele)..... 448
  - riboflavin assay, 1944-45 (Arnold)..... 455
- Testing biscuit and cracker flour, 1944-45 (Schwain)..... 553

**Corn**

- Alcohol production from using malt (Artis and Bawden)..... 22
- Meal, fiber, crude, determination in (Woodson and Mackenzie)..... 158
- Cracker flour, testing (Schwain)..... 553

**Cysteine**, Effect on gluten dispersion and disintegration (Swanson and Andrews)..... 134**Dehydroascorbic acid**, Oxidizing action in dough (Sandstedt and Hites)..... 161**Distillers' by-products**, see Fermentation by-products**Dough**

- Ascorbic acid action in (Sandstedt and Hites)..... 161
- Bromate requirement predictions (Merritt and Bailey)..... 372
- Chemistry of processing (Baker) No. 6, Suppl. p. 27
- Composition, effect on fermentation (Atkin, Schultz, and Frey)..... 321
- Development, relation to mixing time and flour-water ratio (Swanson and Andrews)..... 60
- Effect of
  - fats on extensograms (Merritt and Bailey)..... 372

*Dough (Continued)*

- oxidizing agents on extensograms (Merritt and Bailey)..... 372
  - papain and -SH groups on gluten dispersion (Swanson and Andrews)..... 134
  - reducing agents on extensograms (Merritt and Bailey)..... 372
  - Fermentation, see Fermentation
  - Flour-water ratios, relation to development and gluten dispersion (Swanson and Andrews)..... 60
  - Formulae, see Baking formulae
  - Mixing
    - comparison of flour and whole wheat meal (Sibbitt and Harris) 531
    - curves, effect of fermentation, rest periods, and ingredients (Johnson and Swanson)..... 204
    - effect of rest periods on mixograms (Johnson and Swanson)..... 204
    - speed, effect on bread volume (Swanson and Bayfield)..... 214
    - time
      - at various KBrO<sub>3</sub> levels (Finney and Barmore)..... 244
      - relation to development and gluten dispersion (Swanson and Andrews)..... 60
      - tolerances of hard red spring wheat (Aitken and Fisher).... 392
  - Oxidizing agents in (Sandstedt and Hites)..... 161
  - Physical properties, extensograph measurements (Merritt and Bailey)..... 372
  - Sponge, investigation of shorter (Johnson)..... 255
- Enriched flour**, see Flour, Enriched
- Enzymes**
- Assay methods (Landis)..... 1
  - Standardization (Landis)..... 1
  - Units (Landis)..... 1
- Ethanol**, see Ethyl alcohol
- Ethyl alcohol**
- By-products, amino acid composition (Baumgarten, Stone, and Boruff)..... 311
  - Production
    - use of malt (Artis and Bawden).. 22
    - from wheat hydrolysates and stillage (Sciarini and Wirth)..... 11
- Extensograph**, Measurement of dough properties (Merritt and Bailey).. 372
- Fats**, Effect on dough extensograms (Merritt and Bailey)..... 372
- Feeds**, Glutamic acid content (Baumgarten, Mather, and Stone)..... 514
- Fermentation**
- By-products
    - amino acid composition (Baumgarten, Stone, and Boruff).... 311
    - glutamic acid content (Baumgarten, Mather, and Stone).... 514
  - Effect
    - of dough constituents (Atkin, Schultz, and Frey)..... 321
    - on mixograms (Johnson and Swanson)..... 204
  - Rate, effect of dough constituents (Atkin, Schultz, and Frey)..... 321
- Fiber**, Crude, in corn meal, determination (Woodson and Mackenzie)... 158
- Fischer reagent**, see Karl Fischer reagent
- Flax**, Choline content (Glick)..... 95
- Flour**
- Analysis, effect of variety and environment, hard red spring wheat (Harris, Sibbitt, and Scott)..... 75
  - Baking quality
    - antagonistic factor in oat bran (Jones and Hutchinson)..... 538
    - effect of
      - baking ingredients on evaluation (Finney and Barmore)... 225
      - variety and environment, hard red spring wheat (Harris, Sibbitt, and Scott)..... 75
  - Biscuit, see Biscuit flour
  - Bleaching, see Bleaching, Flour
  - Choline content..... 95
  - Cracker, see Cracker flour
  - Enriched, riboflavin assay (Hodler and Garnatz)..... 559
  - Hydrogen ion concentration, relation to proteolytic activity (Howe and Glick)..... 502
  - Inhibition of proteolytic activity (Howe and Glick)..... 502
  - Mixing, see Dough, Mixing
  - Mixograms, comparison with unsifted whole wheat meal (Sibbitt and Harris)..... 531
  - Nicotinic acid assay, colorimetric (Steele)..... 448
  - Nutritive value, supplementary value of protein concentrates (Hove, Carpenter, and Harrel)... 287
  - Protein content
    - A.A.C.C. check sample service (Meredith)..... 437
    - effect on
      - baking absorption (Finney).. 149
      - mixing tolerances (Aitken and Fisher)..... 392
    - quality, effect of baking ingredients on evaluation (Finney and Barmore)..... 225
  - Riboflavin assay
    - enriched (Hodler and Garnatz) 559
    - fluorometric (Arnold)..... 455
    - content, Kansas wheat (Whitney, Herren, and Westerman)..... 90
  - Soybean, see Soybean flour
  - Thiamine content
    - A.A.C.C. check sample service (Meredith)..... 437
    - Kansas wheat (Whitney, Herren, and Westerman)..... 90
    - Water absorption, Baking (Finney). 149
- Fusaria**, Use in alcohol production from wheat hydrolysates and stillage (Sciarini and Wirth)..... 11
- Glutamic acid**
- In feed materials (Baumgarten, Mather, and Stone)..... 514
  - Microbiological assay (Baumgarten, Mather, and Stone)..... 514
- Glutathione**, Effect on gluten dispersion and disintegration (Swanson and Andrews)..... 134

- Gluten dispersion**  
 Effect of papain and -SH groups (Swanson and Andrews)..... 134  
 Relation to mixing time and flour-water ratio (Swanson and Andrews)..... 60
- Grain, see Cereals and cereal products**
- Grain alcohol, see Ethyl alcohol**
- Grass, Glutamic acid content (Baumgarten, Mather, and Stone)..... 514**
- Heating, Localized in soybeans, effect on air movements (Milner and Geddes)..... 477**
- Hydrogen ion concentration, Activity relationships in proteolytic activity of wheat milling fractions (Howe and Glick)..... 502**
- Hypochlorous acid**  
 Flour bleaching action in combination with  
 NO<sub>2</sub> (Hutchinson, Ferrari, and Derby)..... 187  
 NCl<sub>3</sub> (Ferrari, Hutchinson, and Derby)..... 197
- Industrial alcohol, see Ethyl alcohol**
- Inorganic elements, In wheat, distribution in center sections of kernel (Morris, Pascoe, and Alexander) . 361**
- Karl Fischer reagent, Use in determining moisture in cereals (Fosnot and Haman)..... 41**
- Kilning, Effect on amylolytic activity of barley malt (Witt)..... 341**
- Loaf volume**  
 Effect of  
 mixing speed and milk solids (Swanson and Bayfield)..... 214  
 protein content (Aitken and Fisher)..... 392
- Malt**  
 Effect of  
 kilning on amylolytic activity (Witt)..... 341  
 SO<sub>2</sub> on amylolytic activity (Witt) 341  
 Sorghum (Kneen)..... 112  
 Syrup  
 effect of storage on appearance (Fosnot and Haman)..... 522  
 photometric determination of appearance (Fosnot and Haman) . 522  
 Use in ethyl alcohol production (Artis and Bawden)..... 22
- Milk solids, Effect on bread volume (Swanson and Bayfield)..... 214**
- Minerals, In wheat, distribution in center sections of kernel (Morris, Pascoe, and Alexander) ..... 361**
- Mixing of dough, see Dough, Mixing**
- Mixograms**  
 Effect of  
 fermentation, rest periods, and ingredients (Johnson and Swanson)..... 204  
 variety and environment, hard red spring wheat (Harris, Sibbitt, and Scott)..... 75  
 From flour and unsifted whole wheat meal, comparisons (Sibbitt and Harris)..... 531
- Mixograms (Continued)**  
 Gluten dispersion as effected by papain and -SH groups (Swanson and Andrews)..... 134  
 Hard red spring wheat varieties (Aitken and Fisher)..... 392  
 Use in mixing time and flour-water ratio studies (Swanson and Andrews)..... 60
- Moisture**  
 Determination in cereals using Karl Fischer reagent (Fosnot and Haman)..... 41  
 In packaged cereals, relation to shelf life (Felt, Buechele, Borchardt, Koehn, Collatz, and Hildebrand) . 261  
 In soybeans, effect on respiration (Milner and Geddes)..... 484  
 In wheat, relation to development of "sick" wheat (Carter and Young)..... 418
- Mold, Growth in soybeans during storage (Milner and Geddes)..... 484**
- Niacin, see Nicotinic acid**
- Nicotinic acid**  
 Assay, colorimetric, in flour and bread (Steele)..... 448  
 In flour and bread, colorimetric assay (Steele)..... 448
- Nitrogen peroxide**  
 Flour bleaching  
 efficiency in combination with other agents (Hutchinson, Ferrari, and Derby)..... 187  
 use of (Ferrari, Hutchinson, and Mecham)..... 101
- Nitrogen trichloride**  
 Flour bleaching  
 action in combination with NO<sub>2</sub> (Hutchinson, Ferrari, and Derby)..... 187  
 efficiency in combination with other agents (Ferrari, Hutchinson, and Derby)..... 197  
 use of (Ferrari, Hutchinson, and Mecham)..... 101
- Nutritive value**  
 Flour, supplementary value of protein concentrates (Hove, Carpenter, and Harrel)..... 287  
 Plant proteins (Hove, Carpenter, and Harrel)..... 287  
 Proteins, determination by feeding experiments (Barnes, Maack, Knights, and Burr)..... 273
- Oats**  
 Bran, factor antagonistic to baking quality of flour (Jones and Hutchinson)..... 538  
 Choline content (Glick)..... 95
- Osborne medal award, to J. C. Baker No. 6, Suppl.**
- Oxidizing agents**  
 Action in dough (Sandstedt and Hites)..... 161  
 Effect on dough extensograms (Merritt and Bailey)..... 372
- Papain, Effect on gluten dispersion and disintegration (Swanson and Andrews)..... 134**
- pH, see Hydrogen ion concentration**

- Photometer**, Use in determining appearance of malt syrups (Fosnot and Haman)..... 522
- Pigments**, Yellow in soybean flour (Bohn and Favor)..... 296
- Potassium bromate**, see Bromate
- Proteases**, Activity, inhibition in wheat milling fractions (Howe and Glick)..... 502
- Protein**
- Concentrates
    - amino acid composition (Baumgarten, Stone, and Boruff).... 311
    - glutamic acid content (Baumgarten, Mather, and Stone).... 514
    - supplementary value with flour (Hove, Carpenter, and Harrel). 287
  - In flour
    - A.A.C.C. check sample service (Meredith)..... 437
    - quality, effect of baking ingredients on evaluation (Finney and Barmore)..... 225
  - Nutritive value
    - determination by feeding experiments (Barnes, Maack, Knights, and Burr)..... 273
    - plant (Hove, Carpenter, and Harrel)..... 287
  - In wheat, distribution in center sections of kernel (Morris, Alexander, and Pascoe)..... 351
- Proteolytic enzymes**, see Proteases
- Rats**, Feeding tests in determination of protein quality (Barnes, Maack, Knights, and Burr)..... 273
- Reducing agents**, Effect on dough extensograms (Merritt and Bailey). 372
- Reductone**, Action in dough (Sandstedt and Hites)..... 161
- Respiration**, Soybeans, during storage with excessive moisture (Milner and Geddes)..... 484
- Riboflavin**
- Assays
    - in cereals, combined with rapid thiamine assay (Hoffer and Alcock)..... 271
    - fluorometric, in flour and bread (Arnold)..... 455
  - In bread, Fluorometric assay (Arnold) 455
  - In flour
    - enriched, assay (Hodler and Garnatz)..... 559
    - fluorometric assay (Arnold)..... 455
    - from Kansas wheat (Whitney, Herren, and Westerman)..... 90
  - In wheat
    - distribution (Somers, Coolidge, and Hamner)..... 333
    - Kansas (Whitney, Herren, and Westerman)..... 90
- Rice**
- Thiamine content
    - milling products (Cailleau, Kidder, and Morgan)..... 50
    - raw and parboiled (Cailleau, Kidder, and Morgan)..... 50
    - varieties (Cailleau, Kidder, and Morgan)..... 50
- Rope spores**, In soybean flour (Bohn and Favor)..... 296
- Rye malt**, see Malt
- Shelf life**, Packaged cereals (Felt, Buechele, Borchardt, Koehn, Colatz, and Hildebrand)..... 261
- "Sick" wheat**, Effect of moisture, temperature, and storage (Carter and Young)..... 418
- Sorghum**
- Amylases, see Amylases, Sorghum
  - Malt (Kneen)..... 112
- Soybean**
- Choline content..... 95
  - Flour
    - absorption (Bohn and Favor).... 296
    - rope spore content (Bohn and Favor)..... 296
    - use as bread ingredient (Bohn and Favor)..... 296
    - yellow pigment content (Bohn and Favor)..... 296
  - Moisture in, effect on respiration (Milner and Geddes)..... 484
  - Mold growth during storage (Milner and Geddes)..... 484
  - Respiration, during storage with excessive moisture (Milner and Geddes)..... 484
  - Storage, Effect of
    - aeration, temperature, and time on respiration (Milner and Geddes)..... 484
    - heating on air movements (Milner and Geddes)..... 477
- Spectrographic analysis**, Of wheat ash (Morris, Pascoe, and Alexander). 361
- Sponge doughs**, see Dough, Sponge
- Starch**
- Saccharification with sorghum malts and amylases (Kneen)..... 112
  - Wheat, properties in relation to grain maturity (Bice, MacMasters, and Hilbert)..... 463
- Stillage**
- Alcohol production from
    - hydrolyzed (Sciari and Wirth).... 11
    - using malt (Artis and Bawden).... 22
- Storage**
- Malt syrups, effect on appearance (Fosnot and Haman)..... 522
  - Soybeans, effect
    - of aeration, temperature, and time on respiration (Milner and Geddes)..... 484
    - of heating on air movements (Milner and Geddes)..... 477
    - on respiration with excessive moisture (Milner and Geddes)..... 484
  - Wheat, relation to development of "sick" wheat (Carter and Young) 418
- Sulfur dioxide**, Effect on amylolytic activity of barley malt (Witt).... 341
- Sulphydryl groups**, effect on gluten dispersion (Swanson and Andrews) 134
- Syrup**, Malt, see Malt syrup
- Temperature**
- Effect on
    - experimental baking (Bayfield, Johnson, and Swanson)..... 547
    - respiration of soybeans with excessive moisture (Milner and Geddes)..... 484
  - Wheat, relation to development of "sick" wheat (Carter and Young) 418

**Thiamine**

- Assays, in cereals
  - colorimetric (Hochberg, Melnick, and Oser)..... 83
  - combined with rapid riboflavin assay (Hoffer and Alcock)..... 271
- In bread
  - Army (Meckel and Anderson).... 429
  - retention in Army (Meckel and Anderson)..... 429
- In cereals, colorimetric assay (Hochberg, Melnick, and Oser)..... 83
- In flour
  - A.A.C.C. check sample service (Meredith)..... 437
  - from Kansas wheat (Whitney, Herren, and Westerman)..... 90
- Loss in baking (Meckel and Anderson)..... 429
- In rice, raw and parboiled (Cailleau, Kidder, and Morgan)..... 50
- In wheat
  - distribution (Somers, Coolidge, and Hamner)..... 333
  - Kansas (Whitney, Herren, and Westerman)..... 90

Vitamin B<sub>1</sub>, see ThiamineVitamin B<sub>2</sub>, see Riboflavin

**Water absorption, Of flour for baking**  
(Finney)..... 149

**Wheat.**

- Alcohol production from
  - hydrolyzed (Sciarini and Wirth)..... 11
  - using malt (Artis and Bawden)..... 22
- Amylases, see Amylases, Wheat
- Ash
  - distribution in center sections of kernel (Morris, Alexander, and Pascoe)..... 351
  - spectrographic analysis (Morris, Pascoe, and Alexander)..... 361
- Choline content (Glick)..... 95
- Composition of kernel (Morris, Alexander, and Pascoe)..... 351
- (Morris, Pascoe, and Alexander)..... 361
- Environment, effect on flour properties, hard red spring (Harris, Sibbitt, and Scott)..... 75
- Germinated, effect on amylases (Kneen and Hads)..... 407
- Hard
  - mixing tolerances (Aitken and Fisher)..... 392
  - spring, effect of variety and environment on flour properties (Harris, Sibbitt, and Scott)..... 75
- Inorganic elements in, distribution in center sections of kernel (Morris, Pascoe, and Alexander)..... 361
- Maturity, relation to starch properties (Bice, MacMasters, and Hilbert)..... 463
- Milling fractions
  - hydrogen ion concentration, relation to proteolytic activity (Howe and Glick)..... 502
  - inhibition of proteolytic activity (Howe and Glick)..... 502
  - nutritive value (Hove, Carpenter, and Harrel)..... 287
- Minerals in, distribution in center sections of kernel (Morris, Pascoe, and Alexander)..... 361

**Wheat (Continued)**

- Moisture content, relation to development of "sick" wheat (Carter and Young)..... 418
- North Dakota, effect of variety and environment on flour properties (Harris, Sibbitt, and Scott)..... 75
- Protein
  - distribution in center sections of kernel (Morris, Alexander, and Pascoe)..... 351
  - quality, effect of baking ingredients on evaluation (Finney and Barmore)..... 225
- Riboflavin
  - content, Kansas (Whitney, Herren, and Westerman)..... 90
  - distribution (Somers, Coolidge, and Hamner)..... 333
- "Sick," effect of moisture, temperature, and storage (Carter and Young)..... 418
- Spring
  - hard, effect of variety and environment on flour properties (Harris, Sibbitt, and Scott)..... 75
  - mixing tolerances (Aitken and Fisher)..... 392
- Starch, see Starch, Wheat
- Storage, relation to development of "sick" wheat (Carter and Young)..... 418
- Temperature, relation to development of "sick" wheat (Carter and Young)..... 418
- Thiamine
  - content, Kansas (Whitney, Herren, and Westerman)..... 90
  - distribution (Somers, Coolidge, and Hamner)..... 333
- Varieties
  - effect
    - on amylases of germinated (Kneen and Hads)..... 407
    - on baking absorption of flour (Finney)..... 149
    - of baking ingredients on evaluation of protein quality (Finney and Barmore)..... 225
    - on flour properties, hard red spring (Harris, Sibbitt, and Scott)..... 75
    - mixing tolerance of hard red spring (Aitken and Fisher)..... 392
  - relation of
    - dough mixing speeds and milk solids on bread volume (Swanson and Bayfield)..... 214
    - maturity to starch properties (Bice, MacMasters, and Hilbert)..... 463
- Whole wheat meal, Mixograms, comparisons with flour** (Sibbitt and Harris)..... 531
- Yeast**
  - Glutamic acid content (Baumgarten, Mather, and Stone)..... 514
  - Use in alcohol production from wheat hydrolysates and stillage (Sciarini and Wirth)..... 11
  - Water, effect on gluten dispersion and disintegration (Swanson and Andrews)..... 134
